

CHILDREN IN REHABILITATION CENTERS DISCUSS THEIR FEELINGS

Children advocating, mobilizing, raising awareness, informing and communicating.

Asia and the Pacific: Philippines

Consultation with 12 children (6 girls and 6 boys, 3 Children with Disabilities) aged 11-17 in rehabilitation centres (children in conflict with the law or children deemed at risk). Discussions focused on children's feelings regarding COVID crisis; their views on government response; on the status of their cases; on access to information. Children's recommendations for national and local government.
