

CHILDREN SHARING THEIR EXPERIENCES ABOUT COVID

Children advocating, mobilizing, raising awareness, informing and communicating.

Europe and others: Finland

In its domestic programmes, Save the Children Finland has supported the recruitment of municipal youth workers (who had idle time due to closure of youth centres) to support existing online services (including one-to-one chats and group platforms). New online group services have also been started, and the service hours of online platforms extended. Information about children and young people's experiences and problems during lockdown are collected from chat services and used to inform situation analysis and development of further support.
